GRANDS VINS D'ALSACE EN BIODYNAMIE

Sand 2020

Like the face of a child whose features disturbingly reflect those of his parents, the Sand has borrowed its own from the land where it grew up.

Suspended between heaven and earth, sheltered by acacias and lulled by the discreet whisper of the surrounding forest, the Clos Sand is a place that leaves no one indifferent.

Its breeding has followed the rhythm of this timeless space. It forced us to wait for it, to postpone our bottling projects and to accompany it until the moment when it would fully reveal itself.

The patience he taught us is now largely rewarded.

From the forest that surrounds it, it has borrowed its lively, vibrant and subtly minty character. From its granitic soil it has the brilliance, the salinity and the brilliance, going as far as the chiselled precision of the prisms glittering in the rock. It is straight and slender like a trunk that leads its branches towards the light, to reach the sun and reproduce its warmth through notes of yellow fruit. The Sand is deep, it reveals itself without concession and invites you into its universe...

How to match it? With your everyday life, your favourite dishes, those that you always succeed in preparing, those that your friends hope for when they share your table. The Sand does not make manners, it blossoms in good company, quite simply.
